About

- **Backend Developer** with **2+ years** of professional experience building production REST APIs and web platforms in Node.js, Express.js, and JavaScript, with measurable gains in API speed and efficiency.
- Strong in secure API design (**JWT, OAuth 2.0**, middleware), **PostgreSQL** data modeling with Prisma, microservices, and third-party integrations such as payment gateways, AWS SES, n8n, and BatchData.
- Currently a remote Backend Developer at **Alpha Devs**; previously Backend Engineer at **Zyne Ventures**, delivering full-stack features with Flutter and working closely with product teams.
- BS in Computer Science (SZABIST, 2025); built an **AI voice agent**, a **multi-role CRM**, and a **7-module ERP** for US and UK clients.

Skills

Programming Languages: JavaScript, Node.js

Backend & Frameworks: Express.js, Next.js, Flutter, Prisma ORM

APIs & Security: RESTful APIs, JWT, OAuth 2.0, middleware, payment gateway integration

Architecture: Microservices, asynchronous programming (async/await, Promises), caching, query optimization

Databases & Storage: PostgreSQL, MySQL, MongoDB, Supabase, Cloudinary

Integrations & Automation: n8n, BatchData API, AWS SES, Vapi AI

DevOps & Tools: Vercel, CI/CD, Git

Methodologies: Agile, Requirement Analysis, Product Roadmap, Wireframing

Experience

Backend Developer, Alpha Devs – Karachi, Pakistan (Remote) May 2026 – present

Remote backend developer building and maintaining **Node.js APIs** and payment-enabled services for scalable web applications.

- Engineered **RESTful APIs** with Node.js and Express.js for scalable web applications, improving request handling efficiency by **35%**.
- Deployed and maintained backend services on **Vercel** with smooth CI/CD workflows and reliable production uptime.
- Integrated **JWT-based authentication** and middleware to secure API access.
- Implemented **payment gateway** integrations for seamless and secure transaction processing.
- Collaborated closely with frontend developers to align APIs with UI requirements, reducing integration bugs and improving delivery time.

Backend Engineer, Zyne Ventures – Karachi, Pakistan Nov 2025 – Apr 2026

Backend engineer on full-stack web and mobile products (**Node.js, Flutter, PostgreSQL**), working directly with product teams.

- Designed and developed **full-stack web applications** with Node.js backend services and Flutter for cross-platform mobile.
- Optimized API performance with asynchronous programming (async/await, Promises), improving server response time by **40%**.
- Built **RESTful APIs** with optimized query handling and caching, improving data retrieval speed and cutting network load by **30%**.
- Integrated **JWT-based authentication** to secure data and manage access.
- Optimized **PostgreSQL** performance with indexing, reducing query latency and supporting high-volume traffic.
- Translated business requirements into scalable solutions on a **microservices architecture**, in close collaboration with product teams.

Mobile Developer Intern, Technosys – Karachi, Pakistan July 2024

Internship building an **HR management app** for recruitment workflows.

- Developed an HR management app covering job postings and applicant tracking to streamline recruitment.
- Automated repetitive HR workflows, reducing manual workload by **70%**.
- Worked with cross-functional teams to define requirements, plan sprints, and deliver milestones on time.

Education

Shaheed Zulfiqar Ali Bhutto Institute of Science and Technology, BS in Computer Science 2021 – 2025

Beaconhouse School System, High School / A-Levels 2017 – 2019

Projects

Film & TV Set Construction ERP | Next.js, Node.js, PostgreSQL, Prisma, AWS SES, Cloudinary June 2026

Built a custom **7-module ERP** for a UK film and TV set construction firm, unifying procurement, crew management, payroll, and live cost reporting; automated **BECTU-compliant payroll** and Fixed Price vs. Cost Plus profit tracking, with AWS SES email triggers and Cloudinary document validation enforced at the database layer.

PFC CRM | Next.js, Node.js, PostgreSQL, Prisma, Supabase, BatchData, n8n May 2026

Engineered a **multi-role real estate CRM** for a US-based operation, replacing spreadsheet workflows with automated lead ingestion and territory routing via **n8n webhooks** and the BatchData API, using atomic database operations to prevent assignment race conditions.

AI Dental Receptionist Voice Agent | Node.js, Vapi AI, PostgreSQL, Prisma June 2025

Developed an **AI voice agent** that automates patient inquiries, appointment scheduling, and call handling in real time, integrating Vapi AI with a Node.js backend and storing bookings and interaction history in PostgreSQL via Prisma.
